

Week 4 : Frontend Connected to Backend

Project Name: AI-Powered Crop Advisory Chatbot (Prototype)

Intern Name: Vennapu Sree Sai Chandra Harsha

Intern ID: TBI-26100998

Screenshot 1 : Dashboard

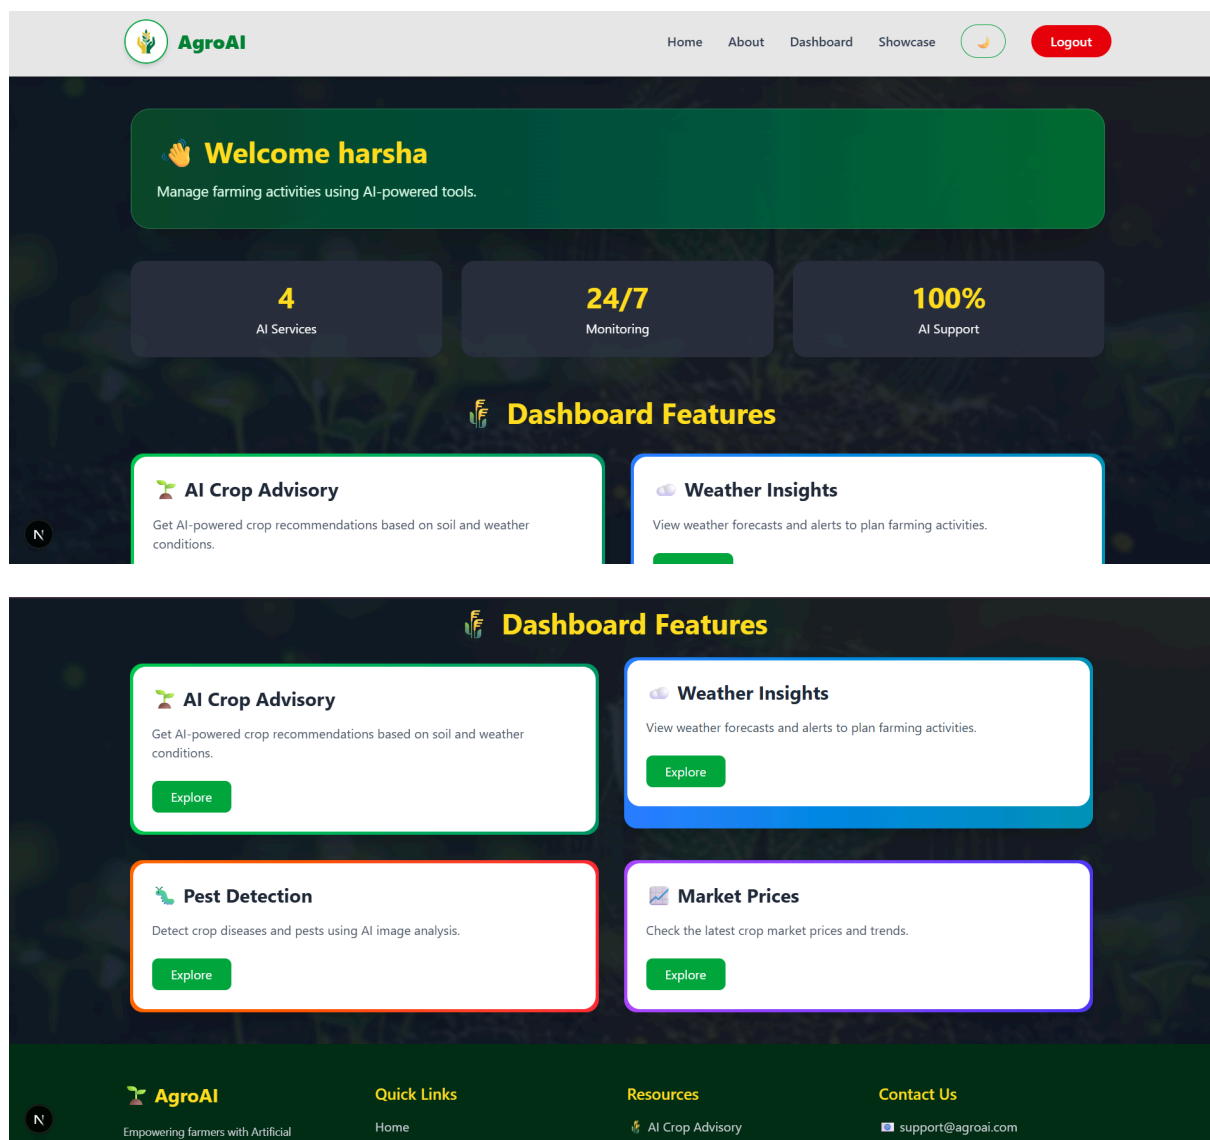

Figure 1: Frontend displaying dashboard data retrieved from the backend.

Screenshot 2 : Login Page

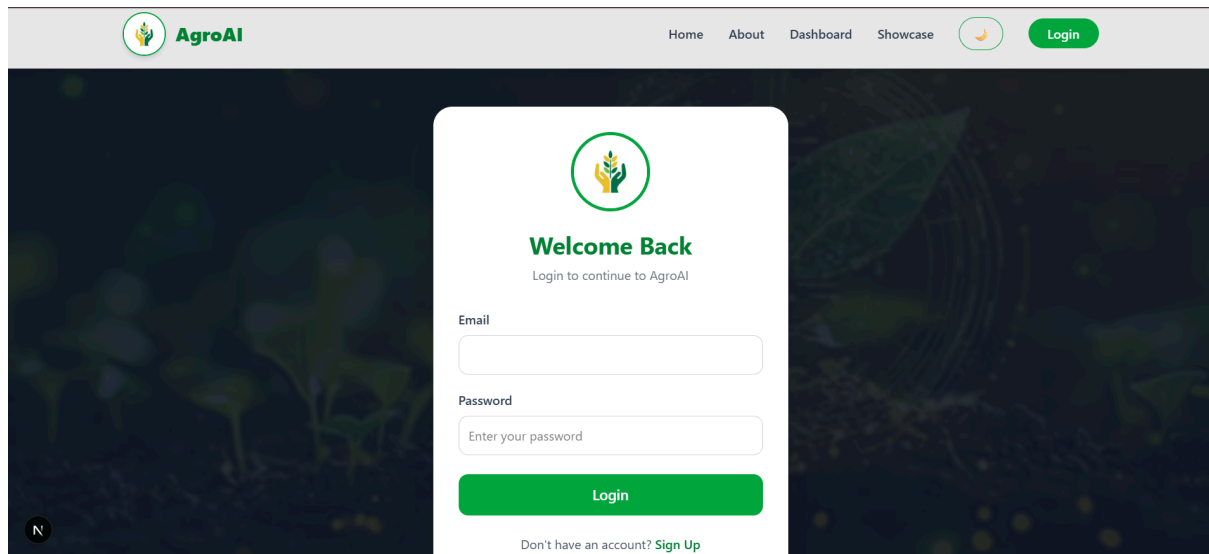

Figure 2: Frontend displaying login page data retrieved from the backend.

Screenshot 3 : Network tab in Chrome DevTools

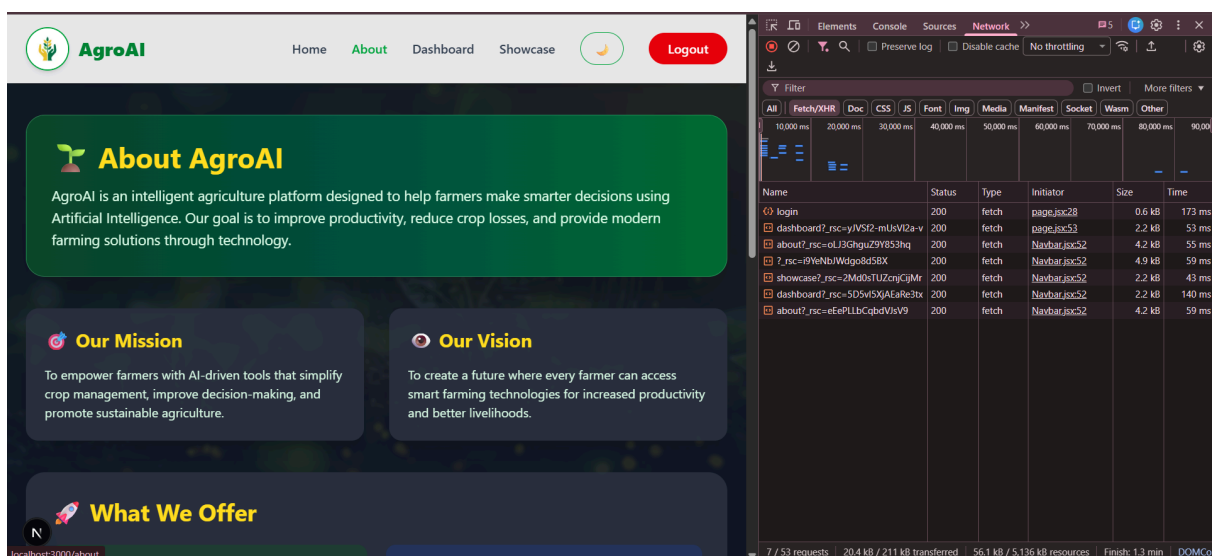

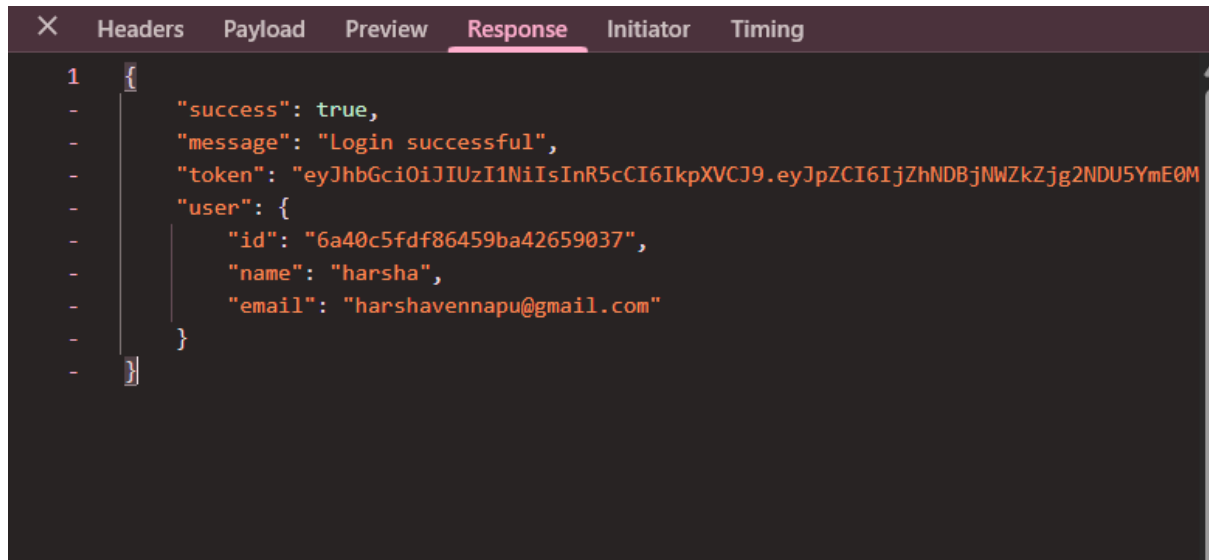

Figure 3 : Successful API request (HTTP 200) shown in Chrome DevTools.

Screenshot 4 : API Response

The screenshot shows a web client interface with tabs for Headers, Payload, Preview, Response, Initiator, and Timing. The 'Response' tab is selected, displaying a JSON object. The JSON indicates a successful login with a message, a token, and user details including an ID, name, and email.

```
1 {  
  -   "success": true,  
  -   "message": "Login successful",  
  -   "token": "eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9.eyJpZCI6IjZhNDBjNWZkZjg2NDU5YmE0M",  
  -   "user": {  
  -     "id": "6a40c5fdf86459ba42659037",  
  -     "name": "harsha",  
  -     "email": "harshavennapu@gmail.com"  
  -   }  
  - }
```

Figure 4 : API response received successfully from the backend.
